STRINGING

Contact: Hello@boomtennis.co.uk

Choose your tension

	Low tension (48-52lbs)	Higher tension (53-58lbs)
Speed	MORE	LESS
Control	LESS	MORE
Comfort	MORE	LESS
Durability	MORE	LESS

Choose your string type

SYNTHETIC GUT - Made of nylon this provides a soft comfortable feel for players and is fairly durable. Not ideal for big hitters

MULTI-FILAMENT - Woven together from thousands of microfibres this offers elasticity and power but can fray / break. Ideal for players who are suffering with elbow, wrist or shoulder pain but it will require regular restrings. Great in a hybrid alongside a polyester.

NATURAL GUT - Made from natural fibres the string provides comfort and power but loses tension and ages quickly. Good for players who need feel and touch in their game but also dont mind regular restrings. Great in a hybrid alongside polyester.

POLYESTER - Unmatched durability with control and spin. Ideal for adult club players.

MONOFILAMENT - This single strand plastic string gives a good feel and control but can snap easily. Can be used in a hybrid. Good for club players who need feel and touch.
